

What impact will changing the wrapping have on me?

The wrapping work will not cause any extra noise, nor have any health risks, for people living nearby. We understand though that work in and around the tower may cause feelings of distress or anxiety.

If you are feeling this way and need someone to talk to please speak with your GP, or contact the Grenfell Health and Wellbeing Service by phone on 020 8637 6279, email grenfell.wellbeing@nhs.net or by self-referring on its website at www.grenfellwellbeing.com

Do you have any concerns about the stability of the site?

No, the tower is safe and stable. This has been confirmed by a range of experts, including an independent surveyor, structural engineering consultants and the Health and Safety Executive. There are a number of measures to keep the site safe and we monitor it 24/7.

How are you consulting with the local community about this work?

The Ministry for Housing, Communities and Local Government have been talking to local schools, residents, residents' associations, community groups and neighbourhood teams about the rewrapping work and the schedule of activity. As a result of this feedback, for instance, we'll be completing works at times of the day which will limit disruption to local schoolchildren. We'd like to keep you updated about the wrapping work and other issues to do with the site. If you'd like to receive our updates please let us know using the contact details at the end of this leaflet.

Further information

You can keep up-to-date about the rewrapping work and the Grenfell Tower site in a number of ways.

Email our site management team at GrenfellTowerSite@communities.gov.uk or **call them** on 0303 444 0011 – they'll be happy to help if you have any comments or questions.

Check out the **digital signs** placed on the hoardings around the site (from February 2020).

Come to one of our regular **drop-in sessions** at the Curve. These are publicised locally. No appointment is required, just pop in and say hello.

Visit the **GOV.UK website** and search for a page called Grenfell Community Updates – this contains regular updates about the day-to-day management of the Grenfell Tower site.

Lastly, from February 2020 we expect to start sending out occasional **text messages and emails** from the Grenfell Tower site management team. You can subscribe for one or both of these by providing your contact details at one of our drop-in sessions at the Curve (or other events we run), emailing the site management team using the email address above, or via the Grenfell Community Updates page on the GOV.UK website.

Keeping you updated about the Grenfell Tower wrapping

The Grenfell Tower site is managed by a Government department called the Ministry of Housing, Communities and Local Government. It's the department's job to keep the site safe and secure until long term decisions are made about its future.

One of the things the department does to maintain the site is keep it enclosed in two layers of protective wrapping. The outside layer of the wrapping needs to be updated once a year.

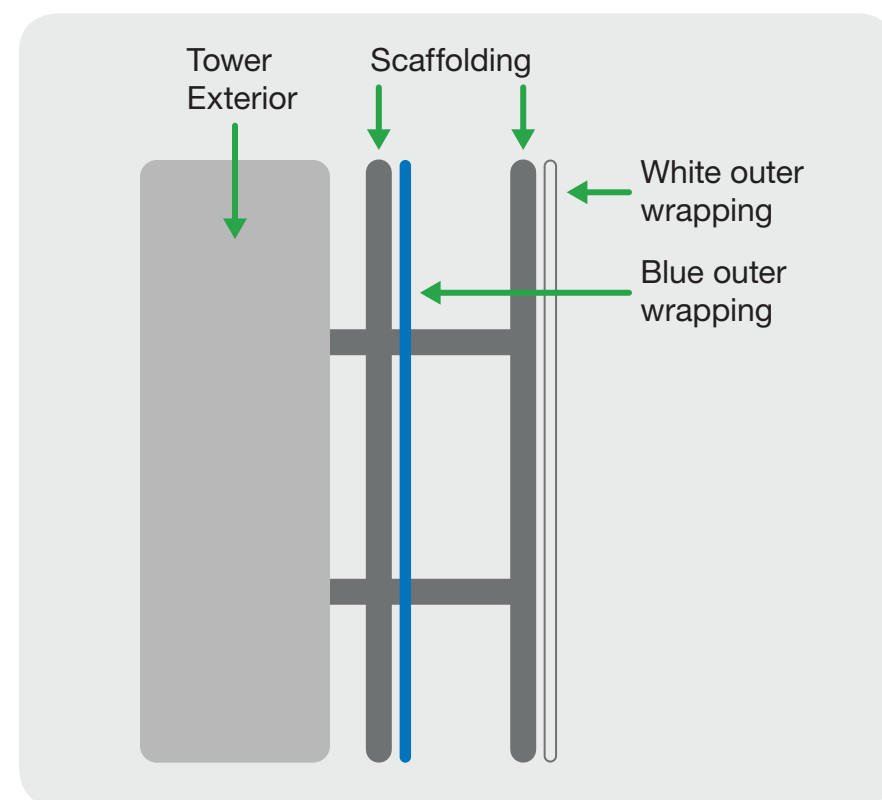

This leaflet explains why, and how the process will be managed. Hopefully it will answer any questions you may have, but don't hesitate to get in touch with us if you want more information.

What is the wrapping that covers the Tower?

There are two layers of wrapping attached to the scaffolding around Grenfell Tower – an inner layer of blue wrapping and an outer layer of white wrapping.

Why do you have the wrapping?

The two layers of wrapping protect the building from the weather and prevent loose material falling into public places. The wrapping also sensitively and respectfully covers the building from view.

Why does the wrapping need to be changed?

The wrapping material deteriorates over time so we need to replace it occasionally to make sure that it continues to be effective. It's only the outer white layer that is being changed – the blue inner layer will not be changed as it is not as exposed to the weather.

When will the outer layer of wrapping be changed?

We're scheduled to start the work in February 2020. We'll be replacing the outer layer wrapping on a floor-by-floor basis and expect this to take about 10 weeks. However, this timescale will very much depend on the weather. We'll keep you updated on the progress of this work and whether the timescales are likely to change.

Will this affect the banners at the top of the Tower?

The banners at the top of the Tower do not need to be replaced as part of this programme of works and will not be changed.

What will I be able to see while the outer wrapping is being changed?

As the white wrapping is changed there may be times when you can see some of the blue inner layer of wrapping and scaffolding. You will not be able to see into the building, however, as that will be covered by the blue wrapping.
